CHULATHEP SILAPANUNTAKUL (ISAAC) - Suankularb Wittayalai

Standpoint

One will succumb to illness one day. I view medicine as a way to help mitigate one's pain and suffering when that day comes. This particular view of mine has developed as a result of being exposed, and latterly, keen observation and helping in my part in my family's routine medical outreach programmes in the rural of Thailand – ever since I was young. On the basis of compassion for others fellow humans and oneself, along with rigorous training and relentless self-improvement, I believe that I have the potential as an aspiring fit for the medical programme at Faculty of Medicine, Siriraj Hospital, Mahidol University. I esteem to join the medical profession, as a part of the team to make the patients be fortunate to have me as their doctor and for me to help them amidst their ailments.
